

Trim Road Widening and Realignment Project – 174 to Innes Road

Project Overview

The City of Ottawa is undertaking the preliminary and detailed design for the widening and realignment of Trim Road. The limits of this project are:

- Trim Road - OR 174 to Innes Road
- Frank Kenny Road - Trim Road to 1.4km south of Innes Road
- St. Joseph Boulevard – OR 174 off ramp to Trim Road
- Old Montreal Road – Trim Road to Dairy Drive.

A Schedule 'C' Environmental Assessment (EA) for this project was previously completed in September 1998 followed by an EA Addendum that was completed in August 2002.

The proposed work includes:

- Roadways are to be widened to a 4-lane, urban, divided cross-section, including bike lanes and concrete sidewalks/multi-use pathways facilities on both sides.
- Signalized intersection will be provided at major roadways including auxillary lanes (left or right turn lanes) as warranted.
- Installation of watermains along St. Joseph Boulevard, Trim Road and Watters Road.
- Installation of storm sewers throughout the limits of the project.
- Streetlighting will be provided throughout the limits of the project.
- Landscaping will be provided where permissible.
- Utility relocations will be completed as required.

The project is to be constructed in three (3) phases:

- Phase 1: Watermain construction in the future Trim Road alignment from Portobello to Valin including servicing to Cardinal Creek Park – Construction to commence in spring/early summer 2011
- Phase 2: Trim Road realignment from OR 174 to Innes and the widening of St. Joseph and Old Montreal Road – Construction to commence in spring 2012
- Phase 3: Frank Kenny Road realignment from Trim Road to 1.4km south of Innes Road – Construction to commence beyond 2016 when funding has been reserved.
